1 Introduction

This text would appear just from the left side below the introduction

Let's Begin with a formula $e^{i\pi} + 1 = 0$.

But we ca also do

$$e = \lim_{n \rightarrow \infty} \left(1 + \frac{1}{n}\right)^n = \lim_{n \rightarrow \infty} \frac{n}{\sqrt[n]{n!}}$$

we can do another:

$$e = \sum_{n=0}^{\infty} \frac{1}{n!}$$

For continued fractions:
